

# Safran Climate Strategy

2023

# Decarbonization at the core of the Safran's CSR strategy

**Decarbonize  
aeronautics**

**Be an exemplary  
employer**

**Embody responsible  
industry**

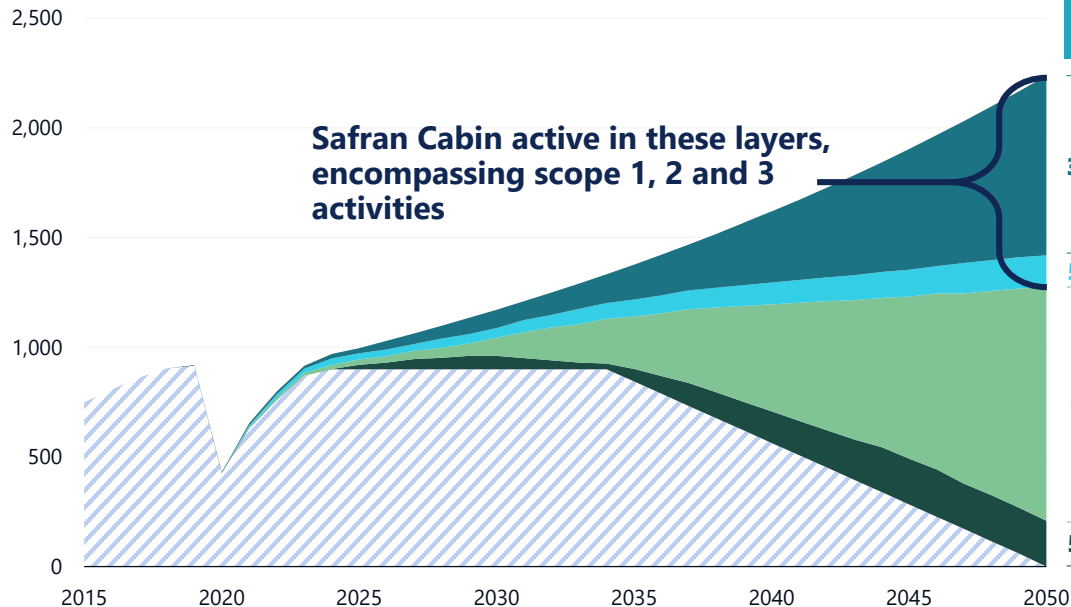

**Affirm our  
commitment  
to citizenship**

# Driving innovation to decarbonize aviation: our targets

GHG emissions from commercial aviation (MtCO<sub>2</sub>e)

**Safran active on levers to address nearly 90% of CO<sub>2</sub> reduction targets**

- 35 - 40 %** Propose best-in-class products today
- 35 - 40 %** Prepare disruptive technology for next-generation engines and aircraft
- 5 - 10 %** Scope 1+2 – decarbonizing operations
- ~50 %** Accelerate the uptake of sustainable aviation fuel (SAF):
  - Technically already available
  - Only option for widebody
- 5 - 10 %**

Resulting emissions – net zero by 2050    Offsets and negative emissions  
 Sustainable aviation fuels    Operations improvement    Technological progress

# Cabin Green Innovation Program (GRIP) – Taking a lifecycle view
